

## About IdealSorter

IdealSorter - Let all your Files to be in Ideal Order! IdealSorter - is a powerful audio, video, image, text, archives and other files organizer, that will sort, organize and rename all your files according to their content, fast and easy. Let all your files to be in ideal order! Support variety of media and document formats: MP3, AVI, DIVX, PDF, DOC, RTF, JPG, PNG, BMP, ZIP, RAR and HUNDREDS of other media formats. It will sort, organize, rename all your files, even if they are packed in ZIP and RAR archives. No more files with names like "mp3s.rar" or "audio27.mp3" - Powerful File Sorter will rename all such files according to their content and move to appropriate folders. And even more - all options may be changed by your choice. IdealSorter will organize your files of any type -

- Music records (mp3,ogg,mpa,wma, etc.)
- Video records (mp4,divx,avi,wmv,etc.)
- Images (jpg,png,tif,wmf,bmp, etc.)
- Text documents (doc,rtf,pdf,htm, etc.)
- Programs installation packs (exe,msi,bin,com,etc.)
- Archives and all files in archives (zip, rar, etc.)
- Files of any other types (over powerful artificial intelligence-based mechanism)

IdealSorter support hundreds of media formats, even if they are packed in archives. While files processing, you will see all, that is happening, even content of archives, that are processed now. And even more - you can on the fly do with files, that were appended to databases all, that you want - copy, cut, delete or move to another location. How it work - Examples That's how IdealSorter organize music and other media files over renaming and moving to folders, according to file content: File content type Original file name and address File name and address after processing by IdealSorter

- Music

"new folder\

track14.mp3" "Audio\Instrumental\Vanessa Mae\The Classical Collection\Folk Tune.mp3";

- Software "progs\st25.exe" "Programs\Adobe Systems Inc\Adobe Acrobat Professional\v4.1\2004.12.1 9-23\Setup.exe";
- Text "texts\doc46.pdf" "Bill Morris\2007\February\Monthly report.doc";
- Images "photos\5486.jpg" "Images\Black and white\Drawing\800x600\Artificial intelligence.jpg"
- Archives "arch\4216.rar" "Archives\September 2009\Arcade Novologic game v.6.4.rar" User opinions That's what people say about such IdealSorter possibilities:

"Our department store all non-private files, transmitted over satellite network. Every day we receive millions of new files. All this data must be somehow organized, so any of our clients could easily find among that files what he need. We tried all file organizing tools, presented on market - and chosen IdealSorter. Why? Extremely flexible settings. We set up different processing rules for audio, video, text, executable files and archives. No one program can do it today. " Victor Acosta, chief engineer of data processing center in Scientific Atlanta, Inc. Our mission

Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of information is stored in files.

In 1970's, when first floppy disk was invented, it had 0,1 Megabyte size and often hold up to 15 files. In 1980's was invented CD disk, that already had 500 Megabyte size and could hold already thousands of files. In 1990's became popular DVD disks, that could carry already dozens of thousands of files. Today most of files are stored on HDD (Hard Disk Drives), that are presented in every computer. They have size beginning from 80 000 Megabyte and hold millions of documents.

Several weeks ago was already started production of Hard disk with 470 000 Megabytes size, that is able to store already milliards of documents in variety of formats.

When on a computer are stored such variety of files, especially if they are packed in numerous of archives, it is extremely hard to navigate between them. People often don't know, what files and where are stored.

When in a folder several hundreds, or even thousands of files with names like "640info.txt", "important(12).doc", "mp312.rar", "confer64.avi", "d12.zip" it will be needed days, or even weeks and months to understand, what is what, rename all and move all in folders, according to content.

A whole directories are deleted, cause there is no possibility to find out, what is inside and use such content.

You are in the danger! Is any solvation of such heavy situation? Yes, and it is - IdealSorter.
