

There are many media sorters - MP3, music, photo sorters. What one should I choose?

Question:

There are many media sorters on your site - MP3 sorter, music sorter, photo sorter, file sorter and other media sorters. What one should I choose?

Answer:

Every media sorter, presented on our site, is specialized to do better appropriate media sorting operations.

Use MP3 Music Sorter – if most part of files you want to sort are MP3 music files.

Use Music Sorter - if most part of files you want to sort are music files of MP3 type and another music formats (WMA, OGG, AC3, etc.).

Use Photo Sorter – if most part of files you want to sort are photos.

Use File Sorter – if you want to sort all types of media on your computer, including music of all types, photos and files of other types (books, software installation packs, archives and all files in archives, etc.).

For example:

If you have hard drive full of MP3 music, you should use MP3 Music Sorter .

If you have large amount of music files in different music formats (not only MP3, but also WMA, MPA, AC3, OGG, WAV, etc.) you should use Music Sorter .

If you have large amount of photos, then you hould use Photo Sorter to sort all your photo collection.

If you have both MP3 music and music of other files, photos and archives with books, software installation packs and variety of another files - then you should use File Sorter to sort all your files and media.

So,

All is depending to what files (MP3, music, photos and other media) you suppose to sort.

If you want to sort MP3 music - use MP3 Music Sorter. It's wizards and options are configured to sort all your MP3 music, although it is also able to sort your files of other types.

If you want to sort music not only of MP3 type, but also of other music types (WMA, AC3, OGG, MPA, WAV, etc.) - use Music Sorter. It's wizards and options are configured to sort all your music of all formats, although it is also able to sort your files of other types.

If you want to sort photos - use Photo Sorter. It's wizards and options are configured to sort all your photos, although it is also able to sort your files of other types.

If you want to sort files of all above types or just don't know, what to choose - just use File Sorter. It's wizards and options are configured to sort all your files of all types.
